

LULU AND LEANDER ELOPE, BUT—

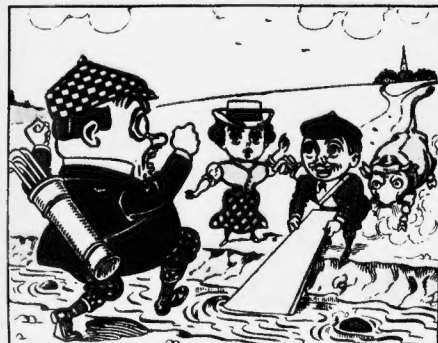

1. LEANDER: "Oh, Lulu, I have found you at last. Come, now is our opportunity; we will elope. Come, quick, a preacher lives across the creek on yonder hill."
LULU: "I will, Leander, dear. I have made up my mind it is the only way. Now, very quietly, so as not to awaken Popper."

2. POPPER: "Ho, hum! A-a-a-h! Lulu! Where are you, Lulu! Say, boy, did you see anything of a young lady around here?"
BOY: "Yes, dere she goes now, down th' hill towards th' creek."

3. BOY: "Th' young man aska her ter elope, an' she says 'Sure!'"
POPPER: "Ye gods! Elope! By the great horn spoon, I'll stop that! Hi! Stop! Stop! I forbid you to elope! I forbid it!"

4. LEANDER (singing): "Oh, I stood on the bridge at midnight, but some-
body stole the bridge." Ha ha ha! My Preacher, I got ahead of you at last!
Nothing can stop our marriage now."
LULU: "Oh, pray calm yourself, Popper. Nothing can prevent our marriage. There is the paragon at the top of the hill."

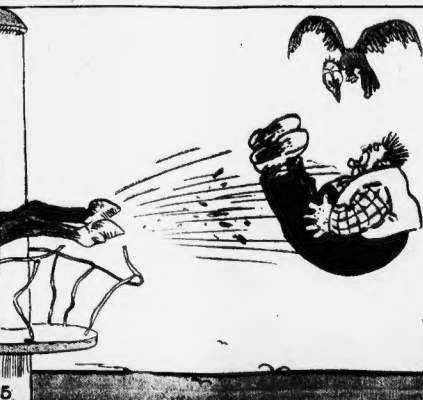

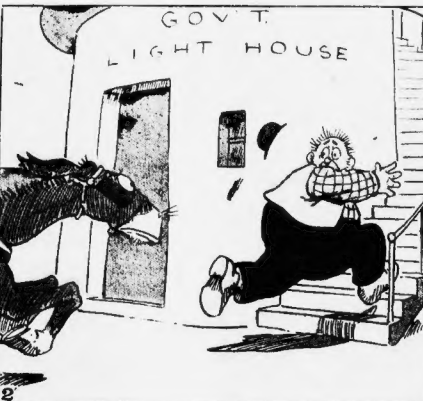

5. LEANDER: "W-E-E-I-W! Who sprung the mine?"
LULU: "Oh, Leander! My poor Leander! Oh, he's killed, he's killed!"
POPPER: "Ho ho! Ha ha! Ha ha! And nothing can prevent our marriage now. Well, we'll see about THAT!"

6. POPPER: "Elope, will you, you child stealer! Get ahead of me, eh? And some one stole the bridge, did they? This is worth living a lifetime for! Oh, that Minister could see me now!"

A Woman Naturalist's Great Work in Taking 300 Photographs of Frogs and Toads, All

Alive and Kicking.

A NEW world has been opened to the public by a woman naturalist. It is the world of frog and toad life. "The Frog Book," by Mary C. Dickerson (published by Doubleday, Page & Co., New York), is a triumph of knowledge, industry, and humor. It is illustrated by over 800 photographs, taken by the author, showing nearly every species of frog and toad in the United States in all the most interesting situations. She describes sixty-seven species of frogs and toads and tells their complete life history.

This book will read a new charm and interest to country life, because it reveals qualities and beauties in the batrachian family of which the average person has never dreamed. The frogs and toads are perfectly admirable creatures, without a single fault from the human point of view. They are innocent devourers of insects, beetles, larks, alert, dignified, calm, composed, entertaining and beautifully decorated.

and back, across the posterior end of the body, along the middle of the underbody and across the breast from arm to arm.

After the skin has split along these lines, the toad begins a process by which the loosened skin is drawn into the corners of the mouth.

The toad sometimes uses the first feet as hands to help him get the skin down from over the eye. Just as a man may remove a shirt, that part of the skin which covers the throat and arms and is nearest the mouth is the last part to be shed. As for more vigorous efforts and the skin slips off the hands, the black head is nearly pulled into the mouth and the process is over.

It may appear odd that much as the American toad lives in water, he never has the pleasure of drinking it in the usual way. All the water he imbibes is absorbed through the skin. This is his greatest pleasure. He breathes with a constant expression in his wonderful eyes and literally makes it in Midsummer when pools are dry, toads travel extraordinary distances to spend the night of the wet ground of a favorite rendezvous.

Miss Dickerson has known a toad to travel a mile or more, day after day, returning to a particularly inviting bed.

It is interesting to find that modern science continues to some extent a curious superstition of the ancients expressed by Shakespeare in that famous passage where he says:

"Sweet are the uses of adversity. Which like the toad, eat and venomous, Where put a precious jewel in its bow."

Toads and some frogs have a kind of poison which they secrete from the glands of the skin. This poison is of the greatest value in protecting the toad from its enemies. It causes many of them to select the toad after taking it into their mouths. If a young toad takes a toad into its mouth it will never permit the act, and perhaps suffers much discomfort for twenty-four hours or more from the poison. Batskins are extremely fond of toads as food, but before they eat them they roll them roughly under their paws on the ground until the poison has been rubbed out of the glands. This poison is so mild in character as to be harmless to man, and human violators rub it on their hands to prevent perspiration.

These little animals are really among the most valuable friends of man. Their economic value is sadly underrated, even in the most backward regions. They have been found to eat insects and other small pests of gardens, grain and pasture. It is estimated that three months a toad will eat 1,000 injurious insects, and that of this number 1,200, of

the Florida Green Tree Frog.

Our Western bullfrogs are the hottest of the kind on this continent, and the most voracious. He is a cautious, frowning water insect, tadpole, fish and smaller frogs. As he goes on growing on river or lake some moonlight night in late June or early July we are certain to hear the deepened call of the bullfrog at unexpected intervals and coming from unexpected directions. He does not stir in chorus. His call is isolated as though he were the bass viol among batrachians. The call resembles, in some degree, the roar of a distant train, but it has a more musical ring and the notes are less blundered and abrupt.

Miss Dickerson describes a morning adverb she had in frogland:

One day I was in a slight confusion in the shallow water at my left, and along came a snake making his way out to me. He was a queer snake as one never saw. He was two long legs extended straight out from the neck, and they were presently revealed as frog legs. A frog has been swallowed by a snake, and the snake is released. With great scared hops he hopped back to the water. The snake goes on still hidden under the leaves and yellow cowslips. Humbly and thoughtfully we cross the water. The croaking tone of the danger become more and more gradual until they are almost a continuous hum again into the hour of noon."

Watch a tree frog leap, catch a swaying branch with precision of aim, and balance perfectly on the frail platform. See the toad that has jumped to the top of the aquarium balance himself for a few minutes on the thin glass edge and note his surroundings. Watch a frog approach on some support as if it is tipped. These actions rival the feats of a frog-walker, yet they can be done by a frog whose brain has been removed.

These strange facts, however, do not prove that the frog does not possess real intelligence. After a frog has eaten a stag beetle and suffered acutely from the insect's enormous spines in his interior he will not take the same food again. It is extremely anxious to see a toad pick up a twig, under the impression that it is a worm, place it in his mouth and handle it as if it were a food. Finally he throws it away.

Perhaps the best show of all is to see the toad stalking a large earthworm or caterpillar. He maneuvers around the insect with great caution and circumspection until he finds himself face to face with it, so to speak. Then he begins to swallow it head first, because the natural writhing of the worm helps it down into the toad's stomach. At the same time the toad uses his own hands to make sure that the worm does not slip away.

Frogs and toads are sensitive to various forces in their environment. For instance, the force of gravitation affects the tree frog so that it becomes dizzy and is never at ease unless its head is underneath. Taking a position with arms and legs rigid at ease unless its head is underneath, and throat collapsed, it floats about in the semblance of a common snail or slug.

Watch them turn round and again in de-

erate effort to keep their heads upon most when their support is alternately held upright and reversed in position other tribes of frogs can only live with head downward-inverted lives.

The frog has the functions of the head of man. It cannot progress directly, but moves in a circle by means of neck, instead of directly, as with human beings. Frogs cannot distinguish between a lighted space and a white solid. They will turn toward a white card or paper and try to jump through it, and struggle at the impossible task of working their way into the solid white surface made by the leaf edges of a closed book.

the age of miracles had returned. Then, not being a duke, he staggered away, beaten.

Philip rose.

"Jed-din, I suppose," said the young man, also rising, but with more difficulty.

Philip nodded.

"I thought so. I must learn it. I'm exceedingly obliged to you."

"Oh, that's nothing," said Philip. "Have you a bed to let? I take it you are the manager."

PHILIP MASTERS.

"You don't know me?" exclaimed the young man, with gentle surprise.

"No," Philip answered, "How should I? But as you appeared to be trying to church some one out it naturally occurred to me to come and see you."

"You don't mean to say you don't recognize me from my portrait?" The young man's surprise was becoming almost a hurt surprise.

"What portrait?"

"Why, in the press! I've been interviewed with a portrait by nearly every paper in London. 'The Illustrated,' 'You've never heard of Hilary, the book-maker?'"

"Never!" said Philip, smiling. "You see I'm—"

"Not heard of Hilary, the bookmaker, my dear sir! But he was a very great bookmaker indeed. I regret to have to say it, since he was my father. However, he was strictly home-bred. He used to say he had lost a hundred thousand pounds in bad deals to the House of Lords alone. He did not care so extremely wealthy, and as I had the misfortune to disprove the bookmaking, I was obliged to do something to satisfy my audience. Hence my scheme, sir."

"SAW THE SHAR

TWO GESTICULATING FIGURES VAGUELY SILHOUETTED AGAINST THE BRAZIER."

"Just burn your fingers," said the doctor, "and you will be free of this pain, initiating a woman's voyage," as he flamed by.

"I want your journal," retorted Bland, feeling that the doctor was not to be over-
persuaded in the attempt. As the chairman made no response, he drank the tea. Then a policeman came in, and the doctor and Philip thought he would hand some words to the policeman. The policeman, however, saw him, and he returned to his house and proceeded to his master.

It might have been the date, half a loaf, and a part of the day, and a part of Philip's father, but he did not step by for more than thirty years, and he was being answered by really answered by time, he was answered by time, he was with a white shirt. CHAPTER XX.

YOU know I told you how Tige and I met the old chap who said he had broken his neck in a circus ring, and how we asked him if it killed him, and he said no. Then we bet him that it did kill him, and he lost the bet. Well, one day soon after that we went down along the shore with a crabnet to catch a few crabs. We found our old friend who had broken his neck sitting on a pier with some of his friends, the very friends who swore he had been dead for years. There they all sat telling fish stories.

One old chap told a story about a big fish he caught once and took home alive. It was a great dog shark, and he put him out in the yard with the dog. Next morning he found the dog and the shark chasing chickens. The dog one day got into a fight with another dog, and the fish pitched in and helped him out, even bit the other dog's tail off. The story was a long one, but it wound up by the fish dying of a broken heart because he could not bark like the dog.

Then another old fisherman told of the first fish he ever caught, and when the story ended he really hadn't caught the

"WE FOUND OUR OLD FRIEND WHO HAD BROKEN HIS NECK SITTING ON A PIER WITH SOME OF HIS FRIENDS, TELLING FISH STORIES."

fish. He said he was living inland in a Vermont village, and that one day he decided to go fishing. He went out and dug a worm and put him in a bottle. He shouldered his fishing rod and started off to hunt a place to fish. He walked and walked along dusty roads until finally he grew thirsty and went into a farmhouse to ask for a drink of water. As he drank he looked at the worm in the bottle. The

poor worm looked fagged out, so he gave him a drink, too.

Then he trudged on, and at length grew hungry. He went into a farmhouse and asked the farmer's wife for food. She gave him some club sandwiches, paté de foie gras and ice cream. He fed half of it to the worm, who ate with a vengeance. Well, about sundown he reached a river and sat down, but when he took out the worm to

put him on his hook he looked at the poor worm and saw a tear running down his side. Well, he did not have the heart to put him on his hook when he saw the appealing look on the worm's face, so he put him back in the bottle and started for home.

It grew dark before he was half way home, but the moon came up and on he trudged. Finally at a late hour he reached home, and when he looked at the worm he found he was asleep. He awoke him after shaking him out of the bottle, and put him down where he had found him in the morning. But, what do you think, the worm had eaten so much and grown so fat that he couldn't get back in his hole, and had to stay out all night. Next morning a big robin found him there asleep and carried him away to his nest and gave him to his mate. The moral was that it is never safe to stay out nights.

It's all right for astronomers
To stay up all night long,
And swish and right-angle, perhaps,
Who sing their pretty song,
But little boys should be in bed
About the hour of eight,
And even little girls, I think,
Should not stay out TOO late.
BUSTER BROWN.

OXY RANDPA

The Boys Try Their New Wings, and with Foxy Grandpa's Assistance Do a Little "High Flying."

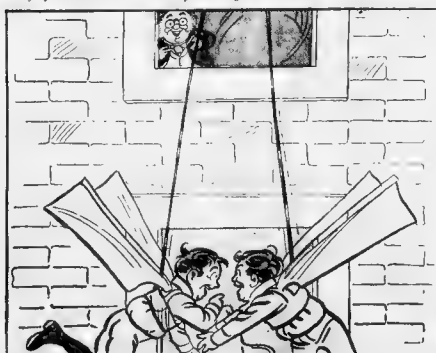

1. BOYS: "Gran'pa, you sit here and we will soon show you how we can fly by the window with our new patent wings."

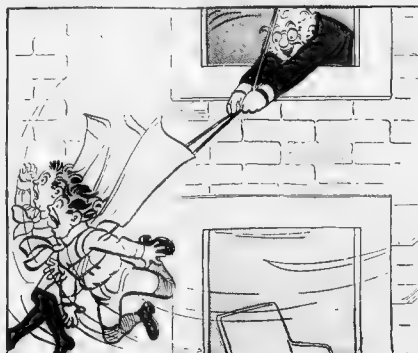

2. BOYS: "Now, Gran'pa, let's swing off."

3. BOYS: "Hoop-la! Here we are, Gran'pa! See how easy it is to fly when you know how."

4. BOYS: "Why, Gran'pa has gone. Oh, dear, our little trick must have frightened him."

5. GRANDPA: "Here is where I give those young rascals a good scare."

6. GRANDPA: "Why, hello, you young mischiefs about! I was only helping you to fly a bit faster."

EDITORIAL SECTION

BOSTON AMERICAN, SUNDAY, JULY 29, 1906

A Big Fight---But NOT Uneven

READERS of this new paper are engaged in the useful work of EDUCATING THEIR FELLOW-CITIZENS. Letters from thousands of them express unshakable determination to make INDEPENDENCE IN POLITICS a reality.

We talk to our readers to-day about THE BEST WAY OF INFLUENCING THOSE WHOM THEY MEET IN THEIR DAILY LIFE.

Of the Sunday newspapers which print this editorial there are more than two million separate copies bought by American citizens. Ten millions of Americans, at least, read these two millions of Sunday newspapers.

THE PERSUASIVE POWERS OF THIS GREAT BODY OF THINKING READERS WILL CONTROL THE NATION IF THEY BE USED INTELLIGENTLY AND IN A RIGHTeous CAUSE.

How are you to convince your neighbor that it is his duty to be AN INDEPENDENT MAN?

How can you, full of earnestness and of pride in GOVERNMENT BY THE PEOPLE, arouse the indignation and active protest of those less earnest than yourself?

First of all we advise this: When you talk to an old man, or a young man, a Democrat or a Republican, a man rich or poor:

Magnify the dignity and the power OF THE BALLOT.

If you speak to a crowd in a public hall, or to three or four gathered in friendly conversation, talk to them in your own way, as follows:

What one thing have you American citizens got that you have a right to be proud of? IT IS YOUR BALLOT.

You know how little the strong men of the country consider you. You know how they ignore the force of numbers represented by the majority.

But you know also that with your ballot, intelligently used, you CAN overcome organized dishonesty, organized plutocracy, organized bribery and criminal monopoly.

The picture on this page tells you the story of American citizenship.

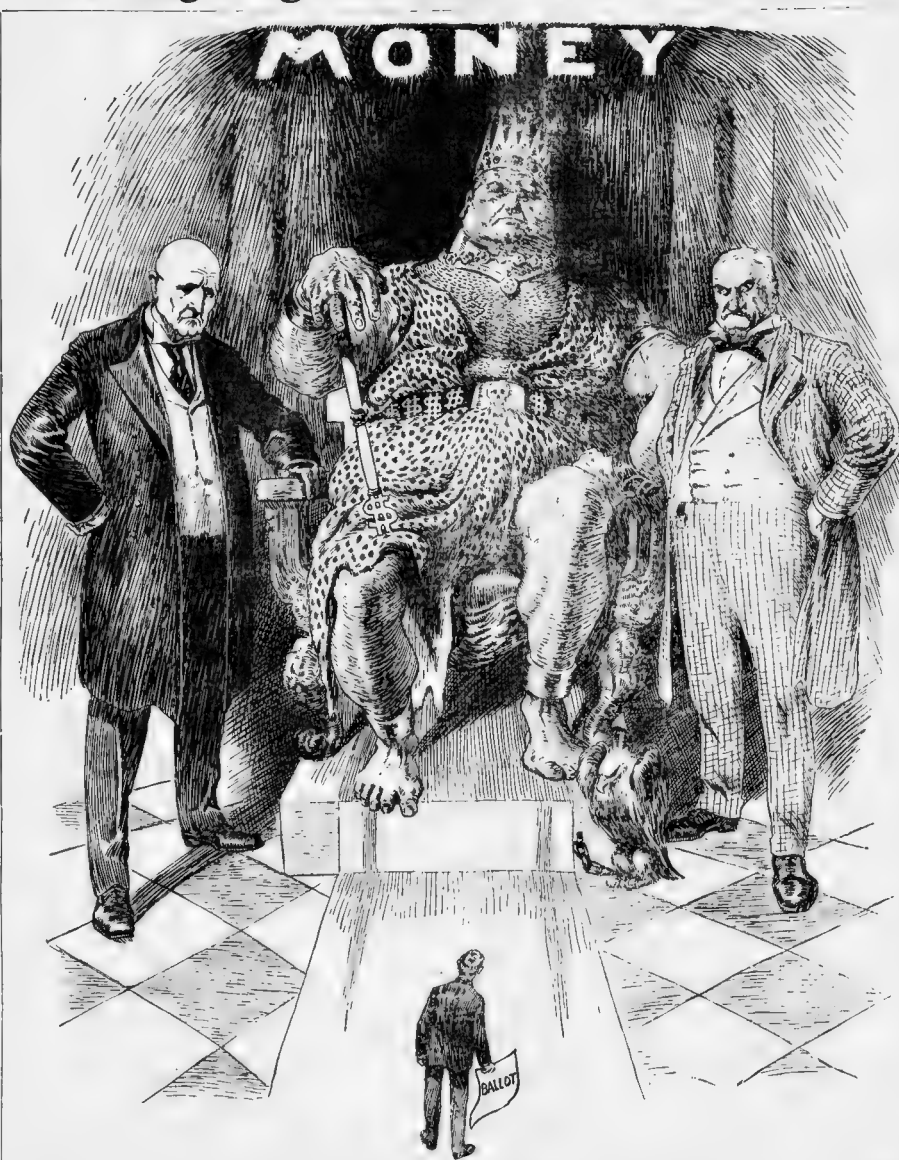

It is face to face with a new power in the world.

Men were once ruled by superstition. That is dead, and its power gone.

Then they were ruled by individual warriors. These have vanished, their weapons are rust, their power is broken.

Then came the kings, ruling in their turn, and they have been overthrown. They are mere memories of a day gone by. The ruler of to-day, shown in this picture, is CRIMINALLY ORGANIZED MONEY, flanked right and left by the courage and the cunning that power can always summon to will.

Your ballot must fight this new power. YOUR BALLOT, USED BY A MIND INDEPENDENT AND THOUGHTFUL, MUST CONTINUE THE WORK OF CONSTRUCTING HERE IN AMERICA A GOVERNMENT AND A NATION FOR THE BENEFIT OF THE PEOPLE WHO LIVE HERE, AND WHO OWN THIS LAND.

The individual man has only his ballot, TRUE. But in that ballot, intelligently and independently used, there is strength to overthrow those so powerful and arrogant to-day.

What are you WITHOUT the independent ballot? What are you, when trickery at the polls or your servility to a political boss, when the Trusts own, make a mockery of your voting power?

Without the ballot you are no better than the meanest peasant in Russia. Not as good, in fact, FOR HE AT LEAST IS FIGHTING DESPERATELY FOR HIS RIGHTS AGAINST DREADFUL ODDS.

Without the ballot, you are no better than one of the street car horses who used to go up and down the city streets in an iron road marked out for them.

The men that own the street railways in your cities own your political bosses, OWN YOUR POLITICAL PARTIES, and you are nothing but POLITICAL STREET CAR

HORSES so long as you run up and down in the grooves that they mark out for you, with no independence, no thought of your own.

Readers, it is your sacred duty to use your ballot for the benefit of your fellow-men and for the benefit of future generations.

And you should impress upon every friend and neighbor the fact that a man whose ballot is cast without thought, WITHOUT INDEPENDENCE, without conviction, is a traitor to his country, a man unworthy of the opportunity which is given to us here BECAUSE OUR FATHERS SHOWED THE INDEPENDENCE AND

THE COURAGE WHICH LATTERLY WE HAVE SEEMED TO LACK.

You know that a carpenter is competent and of use in the world when he has HIS TOOLS with him.

What is a carpenter without his tools?

What is a blacksmith without his hammer and anvil?

WHAT IS THE VOTER WITHOUT THE INDEPENDENT BALLOT?

Everything that we have done in this country has been done by the votes and the independence of the people.

We fought the old country BECAUSE WE WERE DETERMINED TO BE INDEPENDENT.

Shall we allow cheap, miserable financial tyranny to rule us now, after throwing off the control of a born king?

Our very country is based ON THE DECLARATION OF INDEPENDENCE.

Are we going now to say that the American people are independent of England, but NOT independent of Rockefeller or Ryan or Morgan or any other man cunning and criminal enough to buy our corrupt politicians and parties?

The will of the people establishes a monarch.

The votes of the people made the Union greater year by year.

Those votes built our canals, established our postoffice, gave us the rights that we have.

THE CITIZENS WITH THEIR VOTES HAVE BUILT UP THIS COUNTRY FOR THEIR OWN BENEFIT, as the mason and the carpenter build up a house with their tools.

Ask your neighbor WHAT HE IS DOING IN THE WAY OF BUILDING UP OUR NATION.

Ask him what plan HE has in mind when he puts that vote in the ballot box.

Ask him if he ought not to be ashamed to vote blindly FOR THE NAME OF A PARTY, when he belongs to a nation that fought to get the right TO VOTE FOR PRINCIPLES.

Look at the picture on this page and make your friends look at it. Say to them:

That looks like bug odds. The man with the ballot in his hands seems to have a small chance against the forces organized to oppose him.

How much the more glorious that fight with ballots, WHICH IS BOUND TO END IN VICTORY!

How well worthy of a brave man the battle of the intellect, of the will, of honest citizenship, against financial dishonesty, entrenched and apparently impregnable!

Try above all to make a man ashamed NOT TO BE AN INDEPENDENT CITIZEN.

Try to make him understand how the Republican and the Democrat, so-called, standing at the left and the right of organized plutocracy and owned by it, laugh at the dull, servile voters, marching to the polls like sheep.

The American, voting without thought, without will, is below the negro in the Congo with his right arm cut off because he has not supplied the proper amount of rubber to his masters.

It is at least conceivable that that miserable creature WOULD VOTE FOR HIS OWN WELFARE IF YOU GAVE HIM THE CHANCE.

Here are eighty millions of Americans actually holding the vote in their hands, and allowing a few unscrupulous men and a mass of organized dollars to rule them.

Readers, work to inspire your friends with respect for the ballot. WITH PRIDE IN THEIR RIGHTS AS CITIZENS, WITH A DETERMINATION TO MAKE THE INDEPENDENT, THINKING, COURAGEOUS ELEMENT IN AMERICAN CITIZENSHIP THE RULING POWER OF THE LAND. Honor your ballot. Prove your independence.

IN THE NEWS OF THE WEEK

JR. R. T. WILSON JR.

MRS. TALBOT ALDRICH

WOMEN WHO FIGURE IN THE SOCIAL NEWS OF THE WEEK

Mrs. Talbot Aldrich, a former Littleton, who is spending her summer in the North Shore, has just returned from a visit to her friends in the West. She is now in the city, and is expected to remain here for some time. She is a well-known social figure, and is the wife of the late Senator Aldrich.

In Open Letter to Mayor and
Commissioner He Recommends
Prompt Action.
BELIEVES THAT CITY
IS BEING FRAUDULED
Responsibility for Danger to
Life "Up to You," He
Declares.

WHAT MORAN THINKS.
Appears again in the construction
of the concrete foundations of
the Normal and Latin school group
of school buildings on Huntington
avenue.
Branch of contract by the
city.
That the foundations are con-
structed are under the control of
the lives of pupils if the
buildings are completed upon them.
That the responsibility is on the
Mayor and the schoolhouse com-
missioners.
WHAT MORAN ADVISES.
That an immediate investigation
be made.
That the responsibility is up to
the fear on the work and reconstruct
it according to the terms of these
contracts.

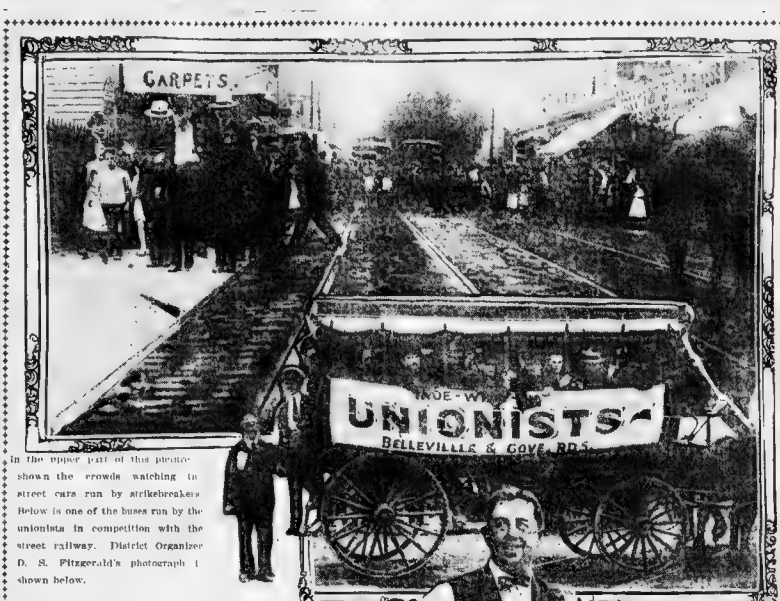

Is an open letter to Mayor Fitzgerald
and the School House Commissioners. District
Attorney John H. Moran declares that the
contractors in charge of the construction
of the Normal and Latin school group
of school buildings on Huntington
avenue, are using inferior quality
of cement and that the foundations
are being built in a dangerous
manner. He says that the city is being
frauded and that the lives of the
pupils are in danger. He recommends
prompt action to be taken by the
Mayor and the schoolhouse com-
missioners.

He Points a Warning.
The District Attorney declares that the
city is being defrauded and that the
lives of the pupils are in danger. He
says that the city is being defrauded
and that the lives of the pupils are
in danger. He recommends prompt
action to be taken by the Mayor and
the schoolhouse commissioners.

2000 Cirled Around the New Bedford Police Station Feeling Officers; Ask Release of Men's Sympathizers 40 ARRESTS IN CAR STRIKE CRISIS

BANDITS, IN REAL WESTERN STYLE, ROB, SHOOT 2 MEN ON CROWDED BOSTON STREETS Business Man and Policeman Victims of Pistol Fight Which Follows Daring Hold-up.

After holding up Thomas Hick-
ey, proprietor of the Esterbrook
Coin Company, in his office at No.
125 Cambridge street, Charles
Linn, shooting him through the
neck and robbing him of \$100, and
beating Patrolman Herman
Brady's leg with a bullet, two of a
mob of robbers were captured by
Patrolman Brady and Crowley of
the Chestnut station, after a
running fight in which many shots
were exchanged. The third man
escaped.

Scot and Hickory are at the Hotel
Nether. Neither is dangerously
injured. The captured highwayman,
who is armed with a revolver, is
locked up at the Chestnut station.
The third man, who was seen
fleeing from the scene, was
described by the witnesses as a
man of about thirty years of age,
tall, thin, with dark hair and eyes,
wearing a dark suit and a light
shirt. He was seen running away
from the scene of the robbery.

American Women Rivals in Grand Hunt for Princesses

MRS. JOHN W. MACKAY **MRS. OGDEN MILLS**
DUCHESS OF AYOUE **LADY CHEYLESMORE**
AMERICAN SOCIETY WOMEN AND THEIR PRINCESS GUESTS IN LONDON

Special Cable to the Boston Sunday American.
London, July 28.—The social features of the past ten days have been the competition among Americans to secure the attendance of royal princesses at their parties. Princess Christian has never gone to so many functions in all her career as this week. Her Royal Highness is said to get very tired when the arrangements for her reception are not perfect, so that business here has to exercise the greatest care.
Princess Louise of Argyll, the beautiful and accomplished daughter of the royal family, is the only hand, always in the highest society and does it with a very different grace than Mackay.
Triumph for Mrs. Mackay.
It was, therefore, through the efforts of Mrs. John W. Mackay, that she was able to secure the attendance of Princess Louise at her home in Carlton House, in the city of London, on the 25th of July. This was a day before the departure of the Princess. The Carlton is the first time London has introduced the fish pond, although it is common enough on the Continent.
Live trout are brought to the Carlton every day from a fish hatchery at Harford on Tyne, 30 miles from London. They are carefully packed in ice and shipped by express, traveling all night, and are delivered in time for lunch.
The guests who are to support the fish pond and the party that is to be given afterward, it is said, will be about 100 in number in this gathering.

HOTEL GUESTS MAY FISH FOR A DINNER

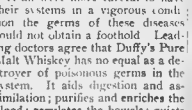

The Carlton Provides Ponds Out of Which One Can Select the Trout He Wants.

SUMMER ILLS

The many ills that come during the hot, sultry weather can be avoided by Duffy's Pure Malt Whiskey, taken regularly as prescribed.
The exhausting heat of the Summer weather causes untold suffering and misery to thousands of men, women and children. Deaths occur on all sides from diarrhoea, dysentery, chills, cholera morbus, typhoid and other fevers, due in a great number of cases to impure water and the consumption of unripe fruits for those whose systems and stomachs are not in a healthy condition.
If all were more careful to have their systems in a vigorous condition the germs of these diseases could not obtain a foothold. Leading doctors agree that Duffy's Pure Malt Whiskey has no equal as a destroyer of poisonous germs in the system. It aids digestion and assimilation; purifies and enriches the blood; regulates the bowels; quiets the nerves; hardens the muscles; stimulates the heart's action and builds up and sustains the entire system.

Duffy's Pure Malt Whiskey can be retained by the most delicate stomach, as it is a food already digested. It is also absolutely pure and contains no fuel oil, and is the only whiskey recognized as a medicine.
All druggists and grocers or direct, \$1 per bottle. Duffy's Pure Malt Whiskey Co., Rochester, N. Y.

Special Cable to the Boston Sunday American.
London, July 28.—The latest and saddest news from the East is that 13 people were killed and many more injured in a motor vehicle accident in London. The accident occurred on the morning of the 27th, when a motor car, driven by a Frenchman, was overtaking a horse-drawn carriage on a narrow street. The car lost control and fell into the path of the carriage, which was then overturned. The driver of the car was killed, and the other passengers were injured. The accident has caused a great deal of discussion in London, and it is believed that the streets should be widened and that motor vehicles should be more strictly regulated.

Special Cable to the Boston Sunday American.
Paris, July 28.—The latest news from the East is that the Japanese have been defeated in a battle with the Chinese. The battle took place on the 25th, and the Japanese were defeated by a large force of Chinese soldiers. The Chinese are now in possession of the city of Peking, and the Japanese have been driven back to the coast. This is a great victory for the Chinese, and it is believed that the war will soon be over.

TROTTING RESULTS AT DORCHESTER MOTOR BOATS MERCEDES WINS ATHLETICS ST. AUGUSTINE GAMES A SUCCESS YACHTING

CUBS EASILY LAND THIRD STRAIGHT HERE, BUT ONE TENNEYITE SEEING THRD

When the Boston Cubs landed at South Boston today, they were met by a large crowd of fans. The team was in excellent spirits and ready for the game. The first inning was a struggle, but the Cubs soon took control. They scored three runs in the second inning and maintained their lead throughout the game. The final score was 3-1 in favor of the Cubs. The winning pitcher was [Name], who pitched a complete game. The losing pitcher was [Name]. The game was played in front of a large crowd of spectators.

Table with 2 columns: Team, Score. Rows include various baseball games and results.

JAMES TENNEYCKWON TOMMY SULLIVAN SENIOR SCULLS FROM DWYER. ON TUESDAY.

At one of the grandest and most important scull races ever held in this city, James Tenneyckwon and Tommy Sullivan, senior scullers, were defeated by John Dwyer on Tuesday. The race was a close one, but Dwyer's superior technique and speed proved to be the deciding factor. The race was held on the harbor and attracted a large crowd of spectators.

Locke Was His Opponent. The race was held on Tuesday afternoon at 2 o'clock. James Tenneyckwon and Tommy Sullivan were the favorites to win. However, John Dwyer, who was a local favorite, proved to be a formidable opponent. The race was a hard-fought one, with both teams showing great skill and endurance.

JACK DOWNEY VICTOR IN SWIMMING RACE

Jack Downey was the victor in a swimming race held at South Boston today. He completed the race in a record time, beating all his competitors. The race was held in the harbor and attracted a large crowd of spectators. Downey's victory was a significant achievement for him and a source of pride for his supporters.

DENNIS HORGAN BROKE WORLD'S RECORD FOR 28-POUND WEIGHT AT SOUTH BOSTON

WESLEY COE, GREAT SHOT-PUTTER. Noted Athletes, Including Sheridan and Leavitt and Wesley Coe, Compete in St. Augustine Athletic Carnival.

Before an attendance of 10,000 persons at the St. Augustine Athletic Carnival, Wesley Coe, a great shot-putter, broke the world's record for the 28-pound weight. Coe's throw was 100 feet and 6 inches, surpassing the previous record of 97 feet and 6 inches held by [Name]. The event was a major highlight of the carnival and drew a large crowd of spectators.

Table with 2 columns: Team, Score. Rows include various athletic events and results from the St. Augustine Athletic Carnival.

LIVELY DORCHESTER SPEEDWAY RACES.

Budweiser and George S. Have a Spirited Five-Heat Setto. The races at the South Boston Speedway were very lively and attracted a large crowd of spectators. Budweiser and George S. were the main contenders in a five-heat setto. The races were closely contested and provided a great show for the fans.

Table with 2 columns: Team, Score. Rows include various racing events and results from the South Boston Speedway.

MADISON'S WIN.

The Madison A. C. won a victory in a recent race. The team was led by [Name] and performed exceptionally well. The race was held at [Location] and attracted a large crowd of spectators. The victory was a significant achievement for the team and a source of pride for their supporters.

Locke Was His Opponent. The race was held on Tuesday afternoon at 2 o'clock. James Tenneyckwon and Tommy Sullivan were the favorites to win. BY W. W. NAUGHTON.

By Boston American Press Wire
The manager of the Nelsons, who have been the scene of the most successful sailing races of the season, has been the scene of the most successful sailing races of the season.

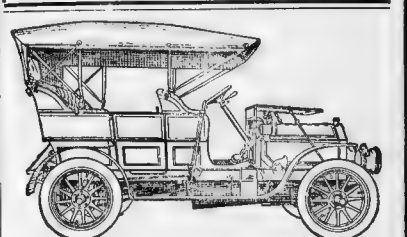

INCOMPARABLE WHITE

Maintained its reputation by finishing Deming contest with a clean score. The car was driven by Augustus A. Post, an amateur, and accomplished the trip without a single adjustment.

In the Glidden contest H. K. Sheridan, driving a White, was penalized but two points, due to three punctures on a twelve-mile control.

WHITE GARAGE, 320 Newbury Street.

PIERCE
Three Pierce Arrow Cars made perfect records in Glidden Tour. The Six Cylinder Pierce Arrow made twice the mileage during the tour without a single adjustment, carrying eight to ten people all of the time. We will have a new Six Cylinder Car in Boston Tuesday. We have a few 40-45 and 28-32 '06 Pierce Arrows which we can deliver in 30 days.

J. W. MAGUIRE CO 745 Boylston Street

Columbia

Mark X. L. V. I., 24-28 H. P., owned and driven by an amateur without professional assistance finished the Glidden Tour with a clean score. Mark X. L. V. I. finished with penalization for tire trouble alone. Not a single adjustment made on either car. We have a few of these \$3,000 four-cylinder cars, make and break, magnet ignition left for immediate delivery.

Columbia Motor Vehicle Co 74 TRINITY PLACE, BOSTON, MASS.

PERFECT SCORE!

What Mr. Moran Charged.
This is what District Attorney Moran had to say to the Mayor about the cement used in the school buildings:
"The specifications require the cement to each unit batch."

Much Cement Unused.
"By arrangement with the representatives of the sub-contractors, a corporation,"
